

**KURSUS NR. 2019-05:**

**Animal Emotions & Advanced Animal Training**

**Kursusindhold:**

In this two day seminar, Karolina spends day 1 discussing how emotional states impact animal's personalities, behaviour and learning, and how these processes influence training outcomes. On day 2, she does a deep dive into some often overlooked learning mechanisms and why animals might stop responding to cues. She also talks about cooperative training, keys to successful shaping and good trainer habits.

This is not strictly a dog-related seminar: there'll be examples from horses, cats, and parrots, too!

**Day 1: Animal emotions: happier animals who thrive with people**

Morning session: Introduction, Core Affect Space, CARE and GRIEF.

Afternoon session: LUST, PLAY, SEEKING, FEAR, RAGE and wrapping up.

**Day 2: Advanced Animal Training**

Morning session:

How classical conditioning impacts learning and behaviour: blocking, overshadowing, respondent extinction and spontaneous recovery, pre-exposure, learned irrelevance and latent inhibition, communication signals (keep-going signals, intermediate bridges, non-reward markers and end-of session signals), superstitious behaviour, and cue problems.

Afternoon session:

The modern principles of shaping.

Predictability and control: start button behaviour and mands.

Useful schedules of reinforcement: Behavioural momentum and matching law, jackpots, Premack, induction and resurgence.

Loopy training, and good trainer habits.

**Deltagere: Kredsinstruktører og lokalforeningsinstruktører**

**Instruktør: Karolina Westlund**

Karolina has a PhD in ethology, she's a researcher, animal trainer and lecturer. She works as an ethologist doing behaviour management of zoo- and laboratory animals, and teaches regularly about behaviour management at universities, veterinary organizations and to pet owners.

She also runs a blog about behaviour management, gives free webinars and online courses.
